### EDUCATION

**B.E. in IT Engineering,  
KJIT**

2017-2021 | Vadodara, India | GPA 3.56/4

## PROJECTS

### Blockfenders - Data Sharing Platform

- Blockfenders is a cutting-edge secure data-sharing platform that revolutionizes effortless and secure data exchange through its "no-code" platform.
- As a Front-End Developer on this project, I played a crucial role in enhancing the platform's capabilities.
- Making reusable programs, optimizing page load times, and choosing the structure and style of the web pages were used to build this website
- My responsibilities included creating new features and ensuring an intuitive user interface by leveraging ReactJS, Mui, Redux, and Tailwind CSS.

### Hanooot - Ecommerce Platform

- Hanooot is a robust ecommerce platform designed to provide seamless product services.
- As a React Developer, I took a leading role in creating the mobile application for iOS and Android platforms.
- Additionally, I contributed to API integration in the web application, ensuring a cohesive and integrated user experience across platforms.

### Klooma - Social Networking Platform

- Klooma is a social networking site, online photo-sharing application, and video streaming service.
- We have established goals and shared deadlines as a team to finish projects on schedule.
- Making reusable programs, optimizing page load times, and choosing the structure and style of the web pages were used to build this website.

### Professional Achievements:

- Successfully delivered 8 web applications, consistently meeting or exceeding client expectations.
- Implemented efficient and scalable front-end solutions, optimizing performance and enhancing user experience.
- Making reusable programs, optimizing page load times, and choosing the structure and style of the web pages were used to build this website.
- Contributed to the optimization of web application performance, resulting in a 37% increase in overall user satisfaction.
